

SSRNovX - Software Engineer & Builder

Email: contact@ssrnovx.dev | GitHub: github.com/ssrnov | TechSpace BuildLab B04

PROFESSIONAL SUMMARY

Results-oriented software engineer specializing in scalable web systems, clean architecture, and responsive interface design. Passionate about performant Vanilla web standards and system design.

EDUCATION

Bachelor of Technology in Computer Science & Engineering

SRM University | 2023 - 2027

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management, Networks

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python, SQL

Tools & Frameworks: Vite, Node.js, Express, Git, GitHub, REST APIs, Vercel

Core Competencies: Responsive Design, Accessibility (a11y), Performance Optimization, Clean Architecture

KEY PROJECTS

Personal Portfolio & Engineering Blog | BuildLab B04

Built a zero-framework, lightning-fast portfolio with JSON blog engine and accessible design tokens.

Distributed Task Queue & Worker Engine

Engineered an asynchronous task processing engine with worker pools, priority queueing, and retry policies.

Resume generated for TechSpace BuildLab '26 Portfolio Project.
